EGA completes Italian recycling acquisition

EGA has acquired an 80% stake in the Italian aluminium recycling company Eco Green, completing all necessary regulatory approvals. The company will be rebranded as EGA Eco Green.

With this acquisition, EGA now has more than 400,000 tonnes per year of aluminium recycling capacity across the UAE, the United States, Germany, and Italy, along with an additional 200,000 tonnes of capacity currently under development.

Midal Cables has concluded its 2026 Summer Internship Programme

A total of 29 students from nine educational and training institutions completed practical workplace experience across 11 technical and business departments. The program brought together students and trainees from government initiatives and both public and private higher education institutions, providing hands-on exposure in areas such as engineering, maintenance, electrical, IT, logistics, production, quality, finance, and other business functions.

Through this experience, participants connected their academic learning with the realities of a professional industrial environment.

Sohar Aluminium donates wheelchairs to the Omani Association

Sohar Aluminium recently donated wheelchairs to the Omani Association for Persons with Disabilities in Muscat. This initiative is part of the company's ongoing commitment to supporting individuals with disabilities.

The wheelchairs are among various assistive devices funded by Sohar Aluminium and distributed to beneficiaries accessing the Association's services.

EGA pilot technology upgrade

EGA has initiated a technology upgrade pilot, known as E40, as part of the ongoing restoration of Al Taweelah to improve productivity and efficiency. This pilot includes upgrades to 13 DX technology reduction cells. Once the pilot is successful, EGA will implement the upgrades across all 808 DX reduction cells in potlines 1 and 2 at Al Taweelah, increasing production by 67,000 tonnes per year.

It would also reduce net specific energy consumption and associated carbon dioxide emissions from power generation by approximately 6% per tonne of metal produced.

EGA signs logistics agreement

EGA has signed a logistics agreement with Gulftainer.

This will enable EGA to expand aluminium exports from the UAE's East Coast to up to 250,000 tonnes in the first year. This will increase to up to 300,000 tonnes in the second year.

The agreement is part of EGA's strategy to strengthen the efficiency and resilience of its outbound logistics and support its ability to serve customers in global markets

Sohar Aluminium organised Decarbonisation and ESG Roadmap Workshop

Sohar Aluminium organised a workshop on Decarbonisation and Environmental, Social, and Governance (ESG) Roadmaps. The event brought together professionals from both the government and private sectors to discuss priorities and practical pathways to achieve decarbonisation and sustainability in industry.

The workshop aimed to exchange knowledge, explore emerging developments, and identify key priorities to support the industry's decarbonisation and sustainability goals while also contributing to Oman's broader national priorities.

Accident don't just happen.
They are caused.
